Senior Software Engineer | Remote (UTC+5:45) | abistha01@gmail.com | +977 9860601754 | github.com/Abidit | linkedin.com/in/abidit-shrestha

SUMMARY

Senior Software Engineer with 4+ years building scalable B2B SaaS platforms, AI-powered features, and developer tools used by 1M+ learners and 40+ global institutions. Expert in React, Next.js, TypeScript, and Node.js with full-stack capability (.NET, PostgreSQL, Supabase). Available full-time remote with US/EU timezone overlap. No visa sponsorship required for remote or contract roles.

EXPERIENCE

Senior Software Engineer — Programiz

Jan 2022 – Present

- **Frontend owner for B2B Pro Teams** — architected and delivered institutional product adopted by 40+ organizations globally including US-based universities and schools; owned architecture, delivery, and stakeholder communication.
- **Led quiz and challenge page redesign** — identified drop-offs via BigQuery cohort analysis, led 3-person cross-functional team (designer, developer, PM), shipped in 8 weeks, validated improved completion rates at 3-month follow-up.
- **Shipped AI-powered hint system using GPT-4o** — designed prompt architecture with hallucination mitigation strategies that measurably reduced challenge drop-offs in production.
- **Co-owned Guided Projects ecosystem** — led user discovery across Discord, email, US colleges and professors; translated insights into shipped product features enabling portfolio-ready project building.
- **Built algorithm visualizers** (Knapsack, Coin Change DP) and **interactive code execution platform** (Stack, Queue) used in academic settings globally; delivered MVP in under 2 months.
- Developed HackerRank-style **Community Challenges** with leaderboards and XP; ran willingness-to-pay experiments converting churn-risk users to annual plans; introduced **Cypress E2E testing**.

Associate Software Engineer — Creatu Devs

Dec 2021 – Jan 2022

- Built a fully responsive React e-commerce interface for GuitarShop Nepal with cross-device compatibility and optimized UX.
-

INDEPENDENT PROJECTS

- **SpectaSnap** (spectasnap-orpin.vercel.app) — Real-time AR spectacle try-on web app using MediaPipe Face Mesh at 30fps in-browser. B2B SaaS prototype for optical stores. React, TypeScript, Canvas API.
 - **NomadWifi** (nomadwifi.vercel.app) — Full-stack crowdsourced wifi map with Google Maps-style layout, Supabase backend with RLS, spam validation, and metadata filtering. React, TypeScript, Supabase.
 - **SpeedBlip** (speedblip.netlify.app) — Browser-based speed monitor with push notifications, historical tracking, and CSV export. React, TypeScript, Vite, Tailwind CSS.
-

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Storybook, Cypress, HTML5, CSS3

Backend: Node.js, .NET APIs, REST, WebSockets, PostgreSQL, Supabase, Firebase

AI / Data: GPT-4o Integration, Prompt Engineering, Hallucination Mitigation, BigQuery, Product Analytics

Tools: Git, Vercel, Netlify, GitHub Actions, Cursor, Figma, Agile, User Discovery

EDUCATION

BSc (Hons) Computing

2018 – 2021

Softwarica College of IT and E-commerce (Coventry University)
